

The AudioControl Architect Model P250EQ features three selectable EQ curves to ease installation and setup efficiency while delivering a tailored, premium solution for each zone. Integrators can choose from Flat, Bass Boost or Bass/Treble Boost curves that have been engineered to enhance the performance of commonly deployed architectural loudspeakers.

AudioControl's SDS Priority Input Switching feature is accessible via a 3.5mm stereo input, facilitating the integration of smart doorbells, network-connected speakers and other devices that can pause/restart the entertainment content in selected zones as desired. The P250EQ features a signal-sensing circuit for auto-turn on/off when applicable.

AudioControl introduces the Architect Model P250EQ Amplifier

Monday, 06 June 2022 17:44

AudioControl has a 45-plus year history of creating award-winning products for integrators and backing them up with superior customer service as well as a 5-year warranty. Engineered and manufactured in the USA, the P250EQ amplifier is yet another example of a best-in-class product from AudioControl.

The AudioControl Architect Model P250EQ will be available July, 2022.
