

Plugin Alliance Mäag Audio EQ4 MS

Plugin Alliance, a part of Native Instruments, today announced the Mäag Audio EQ4 MS 6-band dual-channel mastering EQ plugin. Developed in partnership with Mäag Audio and brainworx, this new plugin offers mastering-grade transparency, exceptional flexibility, and expanded functionality, bringing the classic sound of the Mäag hardware into the digital domain. Based on the acclaimed Mäag Audio EQ4M hardware unit, the EQ4 MS plugin introduces a suite of advanced features including mid/side processing, dual-channel functionality, and extended Air Band control, offering even more options for producers and engineers to shape their sound.

The Mäag Audio EQ4M is celebrated for its transparent sound and the signature Air Band, a unique high-frequency boost that enhances vocals, instruments, and entire mixes without harshness. With the EQ4 MS plugin, users can now access that same signature sound, enhanced by mid/side processing, perfect for widening the soundstage and improving spatial clarity.

Key Features:

- Modeled after the Original Mäag Audio EQ4M Hardware
- Mid/Side Processing
- Sweepable Air Band
- Brainworx's Tolerance Modeling Technology (TMT)
- Additional Bell Filters and Q-Factor
- Scalable UI and Metering Tools

Whether you're mixing vocals, mastering a track, or just adding a touch of that iconic Mäag sound, the EQ4 MS is an essential tool for audio engineers who want an EQ that's both transparent and musical.

Plugin Alliance releases the Mäag Audio EQ4 MS Mastering EQ Plugin
